### **Armstrong Ceilings to Increase Price of Mineral Fiber and Fiberglass Ceiling Panels**

Geographic Coverage: US, Canada – Retail

LANCASTER, PA – Effective Wednesday, May 1, 2024, Armstrong Ceilings will initiate a 5% price increase on all mineral fiber and fiberglass ceiling panels shipped on or after May 1, 2024.

While energy inflation has recently moderated, raw material inflation continues to remain unstable, particularly with respect to several core inputs. We also continue to invest in innovation, technology, products, people, services and resources in support of our mutual opportunities, while remaining focused on effectively managing costs.

For longer-term future quotes, we suggest the following pricing:

- An additional increase of 5% for quotes on or after November 4<sup>th</sup>, 2024
- Another additional increase of 5% for quotes on or after May 5<sup>th</sup>, 2025

This Pricing Bulletin and the above guidance are based on current available information and conditions. Consistent with past practices, we will provide updated pricing information in the form of list pricing, bulletins or other notifications, as appropriate, as additional information becomes available. As always, you remain free to quote, price and contract at whatever pricing you may choose in your discretion. Please always feel free to contact your local area manager with any questions or requests for assistance.

We appreciate and thank you for your business.
